## 1-Chloro-1-[(4-chlorophenyl)hydrazinylidene]propan-2-one

A. M. Asiri, A. O. Al-Youbi, M. E. M. Zayed and S. W. Ng

**Abstract:** The non-H atoms of the title compound,  $C_9H_8Cl_2N_2O$ , lie nearly on a plane (r.m.s. deviation = 0.110 Å), and the C=N double bond has a *Z* configuration. In the crystal, adjacent molecules are linked by an N-H...O<sub>carbonyl</sub> hydrogen bond, forming a chain running along [100].
